Interconnectivity of COSAC web-page and IPEX platform for electronic exchange

In my capacity as Chair of the IPEX Board, it gives me great pleasure to approach you regarding your letter concerning the interconnectivity of COSAC web page and the IPEX platform.

IPEX Board has discussed the letter and agreed that COSAC web page and IPEX platform should be interconnected. Within this context, I would like to offer, that the IPEX website could host the COSAC website.

As COSAC already has a website, a more in-depth analysis based on input provided by the COSAC webmaster is required. Content related to meetings could be hosted on the IPEX website, similar to the EU Speakers conference and others. Content related to Parliamentary information can likely be hosted on the IPEX website, but will be linked to other sections of the IPEX website (National parliaments).

I am looking forward to our continued cooperation.

Sincerely yours,

*Toomas Vitsut
Chairman of the EU Affairs Committee
Parliament of Estonia*
